Neinstein & Associates has been voted as one of the **Top 10 Personal Injury Law Firms in Canada** by Canadian Lawyer Magazine

Neinstein & Associates is honoured to be included in this prestigious list.

Over the last 40 years Neinstein & Associates has been committed to providing the best level of service to insure our clients are properly protected and compensated.

Thank you to all members of the Neinstein team who have helped us become one of the best personal injury law firms in the country and thank you to our peers and clients who voted for us!

Partnership Announcement

We are proud to announce [Stacy Koumarelas](#) as the newest partner at Neinstein & Associates. Stacy has established herself as a diligent lawyer, skilled negotiator and dedicated mentor.

Congratulations Stacy! We look forward to your continued success.

RECENT NEWS & EVENTS

Mental Health Awareness

Mental illness directly or indirectly affects all Canadians, whether it be a family member, a friend or colleague. Twenty percent of Canadians will personally experience a mental illness in their lifetime. It affects people of all ages, cultures, education and income levels.

Neinstein & Associates is dedicated to this cause and ensuring we do our part to advocate Mental Health awareness in our community.

Put up your Dukes

The second annual Put Up Your Dukes event took place on November 15th, hosted by the Lewin family to fight the battle against mental illness.

After the successful opening of Duke's Place, this year's proceeds support the Lewin Family Dining Room located in the Intergenerational Wellness Building at CAMH, where patients can eat and socialize together in a bright and comfortable environment. Neinstein & Associates is proud to support this worthwhile charity.

Neinstein & Associates is dedicated to this cause and ensuring we do our part to advocate Mental Health awareness in our community.

We are lighting up blue!

April is Autism awareness month. In Canada, Autism Speaks, the largest advocacy organization for the cause, is doing a remarkable job educating the general public about this disease and offers numerous programs through their family services department.

Autism now affects 1 in 88 families and 1 in 54 boys. Autism is a public health emergency and we all must work together and react immediately to support this cause. Through the month of April please light up blue on all your social media accounts.

Neinstein & Associates proudly supports Autism Speaks and the Light up Blue Campaign.

Ontario Auto Insurance Premiums a Political Hot Button Issue

Since the drastic reductions in Accident Benefits (No-Fault benefits) in September 2010, the insurance industry have seen staggering profits, with absolutely no appreciable benefit to the millions of policy holders. The NDP have threatened the Liberal Government with another by-election, if the upcoming budget does not include a province wide 15% reduction in automobile insurance premiums.)

In an obvious attempt to deflect attention away for their record earnings, the Insurance Bureau of Canada (IBC) has convinced the Liberal Government that fraud is rampant, and only with the implementation of recommendations contained in their Auto Insurance Anti-Fraud Task Force, will cost savings be passed onto the consumer.

IBC recommendations are self-serving and completely ignore the fact that while benefits available to motor vehicle accident victims have been decimated, our premiums continue to increase, while Insurer profits soar.

Where is the real fraud?

UPCOMING EVENTS
